*Agile Methodologies

*Successfully implementing disaster recovery and back-up procedures and information security and control structures.

Software

Enthusiastic IT Project Leader eager to contribute to team success through hard work, attention to details, and excellent organization skills. I am able to understand the projects' objectives, and propagate the project vision using good interpersonal skills. In addition, my years of experience made me capable of making difficult decisions necessary to get the job done.

Moreover it was through the use of Agile Methodologies (services oriented, iterative development, storyboard construction, direct communication with users, on going changes to requirements, project time management, testing ….) projects would find their place in the production environment successfully and on time.

Work History

July 1991 to Current	BLOM Bank Beirut, Lebanon	
	Job Title	
	2007 - current	*IT Project Leader*
	2001 - 2006	*Software Engineer*
